- Work with councils surrounding airports to manage bird issues
- Use a range of tools and methodologies to manage the risk

ScareAway Pyrotechnics

ScareAway Pyrotechnics is a world leader in its class and ideal for airports needing to control both birds and flying foxes.

The Scare-Away range includes:

BIRD BANGER

An excellent tool to scare birds and wildlife, the 15 mm Bird Banger travels 15 to 40 metres before exploding with a loud report.

SCREAMER SIREN

Another efficient tool to deter nuisance birds, and launched in the same manner as the Bird Banger, the 15 mm Screamer Siren travels 75 to 90 metres, making an alarming siren-like sound as it flies.

LAUNCHER GUNS

We offer the full range of launcher guns.

ScareAway Pyrotechnics

A large blue rectangular area containing silhouettes of many birds flying in the sky, with a large airplane silhouette at the bottom center. The background is a gradient of light blue at the top to a darker blue at the bottom. The text is overlaid on this background.
